

Larry S. Anderson, Ed.D.

P. O. Box 2393 • Tupelo, MS 38803

Phone: 662/844-9630 (Voice & FAX) • Cell: 662.321.0677 • Email: larry@NCTP.com

Founder/Director, National Center for Technology Planning

Former Chair, Council for Education Technology—State of Mississippi

Associate Professor (Ret.), Department of Technology and Education—Mississippi State University

Education:

Ed.D.	The University of Alabama	1992	Administration and Planning
M.Ed.	Mississippi State University	1972	Industrial Education
B.S.	Mississippi State University	1972	Industrial Arts Education

Professional Experience:

1996-2000	Mississippi State University, Associate Professor
1994-2004	Council for Education Technology, State of Mississippi, Chair
1992-Present	National Center for Technology Planning, Founder/Director
1992-1996	Mississippi State University, Assistant Professor
1990-1994	Mississippi State University, Director of Instructional Resources Center
1984-1992	Mississippi State University, Instructor
1981-1984	Starkville, Mississippi, Principal of Armstrong Middle School
1973-1981	Starkville, Mississippi, Teacher at Henderson Junior High School

Professional and Academic Memberships:

Consortium for School Networking
International Society for Technology in Education (ISTE)
Kappa Delta Pi
Mississippi Educational Computing Association
Phi Kappa Phi

Leadership Accomplishments/Honors:

- Board of Advisors, Apple Distinguished Educators, Apple, Incorporated. (2005-2007).
- Editorial Advisory Board, *School Technology Leadership Insider*. (2004-2006).
- Impact 30 (2001)—selected by *eSchool News* as one of the 30 individuals who has most impacted technology in the United States. Other recipients included: U.S. Senator John Glenn; AOL CEO Steve Case, Microsoft Founder Bill Gates, FCC Chairman William Kennard.
- Apple Distinguished Educator (2000). The first higher education representative from Mississippi selected by Apple, Incorporated for inclusion in this austere organization. The only active ADE in Mississippi.
- Editorial Advisory Board, *eSchool News*. (2000-present)
- Selected for Board of Advisors, Center for Applied Research in Educational Technology. (<http://caret.iste.org>) (2001-present)

- International Advisory Board Member, Open Learning Agency, British Columbia Ministry of Education—devoted to innovative, pragmatic applications of distance education and distributive learning, worldwide (one of only two international board members chosen), 2000.
- Southern Regional Education Board (SREB) Instructional Materials Task Group, representing Mississippi higher education institutions and the IHL Board, 2000.
- Board Member, Benton Foundation Digital Divide Advisory Council, 1999-present
- Chair, MS Council for Educational Technology (appointed by Governor in 1994, elected Chair of CET in 1994, reappointed by Governor in 1998, 2002.)
- Board Member, International Society for Technology in Education (ISTE), 1998-2000.
- Founded the National Center for Technology Planning, 1992. This is the premier organization established to provide direction in technology planning, policy, and leadership for the U.S. As a result of demand, the impact of NCTP has spread globally, with direct influence upon governmental decisioning in more than twenty countries.
- Delivered keynote presentations and conducted workshops for multiple groups, including: National School Boards Association; Singapore International Information Technology Conference; Canadian National Technology Planning Summit; National Learning Resources Association; Kentucky Teaching and Learning Conference; Florida Educational Technology Conference; Texas Computer Education Association; Texas Association for Educational Technology; Texas Association of School Boards; Texas Educational Service Center, Region XI; Texas Educational Service Center regional staff convocation (held in Beaumont, TX); Association of Christian Schools International; Mississippi Educational Computing Association; Virginia Educational Leadership Summit; Florida Council on Instructional Technology Leadership (FCITL); and Missouri Technology Coordinator Conference.

Innovative Instructional Accomplishments:

- Master of Instructional Technology & Doctor of Education—Instructional Technology—I was the primary architect for the graduate program in instructional technology at Mississippi State University, College of Education. The original design applied to a master's degree; however, it expanded to include the doctoral program, as well. This was the first, and continues to be the only, graduate degree of this type in the State of Mississippi. I served as the main coordinator for this degree program, serving the areas of: education, business/corporate, government, military, public service, legal, medical, agriculture, and fine arts.
- Distance Learning/Education—Taught several courses in a distance learning format via the first-of-its-kind Mississippi Fibernet 2000 network, a fully-interactive two-way video and audio fiber optics network that was publicly switched. Fibernet sites have computer networks that are bridged through the campus switch and/or the statewide network backbone in such a way that the system forms a Wide Area Network (WAN) to support and augment instruction. Courses I taught via distance learning include:
 - *Emerging Technologies*, a graduate-level course that introduces a smorgasbord of technologies to students entering the Instructional Technology program of study.
 - *Seminar in Planning for Instructional Technology*, a high-level, high-expectation graduate-level course designed to acquaint educators and other instructional personnel with the concepts of the planning process and particular strategies that can be employed to enhance technology infusion throughout society.
 - *Advanced WWW in Education*, a graduate-level course in which students learn imaginative strategies for using the World Wide Web more effectively as a tool for learning, communication, and development.

- *Technology Laboratory Management*, a split-level (undergraduate/graduate) course designed to acquaint students with strategies, policies, and considerations that come into play as one designs, maintains, improves, and manages a technology-enhanced facility for work and learning.
- SERC (Southeastern Education Resources Center) *Interactive Training in Multimedia Technologies*.
- National Technology Plan—Participated with U.S. Department of Education in discussion on development of the original National Technology Plan. Graduate students in my class, “Seminar in Planning for Instructional Technology,” were asked by the Secretary of Education’s office to provide summaries of all discussion. The Internet, generally, and the World Wide Web, specifically, served as the platform on which all this information was transmitted. The transcript of my students’ work remains on the Web and has been referenced often as a key resource to this effort.
- World Wide Web Development—I have created *and maintained* multiple web pages/sites, some of which pertained to classes I have taught. Besides maintaining a *personal* web page, I have created or developed pages for: National Center for Technology Planning; Seminar in Planning for Instructional Technology; Advanced WWW in Education; Hypermedia for Instruction; Technology Laboratory Management; and Technology Applications for Effective Leadership. All this activity strengthened my instructional capacity markedly. In addition to developing web sites and pages for classroom use, I procured multiple domains and constructed a web presence for professional speakers, consultants, and authors, including an innovative site for authors of eBooks and electronically-accessible reports.
- Internet activity by students—All students in all my classes since 1992 were required to have Internet presence accounts and use email, as a minimum, as a means to support instructional activities. I established Internet discussion lists for each class so pertinent conversation could continue between face-to-face class meetings. In addition, I invited specialists and experts from around the world to become a part of these lists; this provided immediate reinforcement from some of the most respected individuals in various professions. Since 1999, students in my classes have been required to create their own web site for posting their class work. Students submitted their work assignments electronically and published their work on the Internet so that anyone in the world could profit from their scholarship. This activity was successful in revolutionizing the way many classes at Mississippi State University were taught.
- Desktop videoconferencing—I pioneered extensive use of CU-SeeMe™, a desktop videoconferencing software solution, several years ago to enhance my instructional activities. Over time, I expanded my practice to include other videoconferencing programs, taking advantage of the multiple computing platforms used by my graduate students around the world. I hosted numerous videoconferences via the Internet and brought several guest speakers into my classes to make presentations via the Internet without leaving their locations. Students were able to demonstrate and talk to experts in the field about work they had performed, regardless of their geographic location. I am unaware of any other instructor at Mississippi State University who ever used desktop videoconferencing **regularly** in classes to broaden and strengthen the engagement of student intellect. Use of desktop videoconferencing in this way provided a positive role model for numerous technology-adopting educators around the world.
- PreSTO (Preservice and Student Teachers Online)—I established PreSTO as an Internet worldwide discussion list devoted specifically to preservice and student teachers, providing a forum in which they can discuss common problems, concerns, celebrations, solutions, and policies. PreSTO has been extremely successful in providing a non-threatening avenue through which students can gain the assistance they need as they pursue their teacher education degrees. PreSTO has approximately 800 subscribers on a regular basis.

Consulting Activities:

- Tupelo Country Club, Tupelo, MS. (2007, December – 2008, February). Consultation and facilitation for first annual Board of Directors Strategic Planning Retreat.

- Collide Festival (<http://www.collidefestival.com>), Celebration Ministries, Bells, TX. (2007, June). Consultation and assistance with Local Area Network (LAN) and other technology needs to support the youth and music festival for 50,000 young people and youth ministers.
- St. Richard Catholic School, Jackson, MS (2007, March – present). External advising regarding technology applications for instruction in a school plant renovation project.
- UpSideBrown, LLC. (2006-present). Ongoing consultation regarding marketing personal assets, writing book, public speaking, and life coaching strategies.
- North Mississippi Medical Center, Tupelo, MS (2006, October). Podcasting as an avenue for professional development, community relations, and general medical center PR.
- JBHM Architectural Group, Jackson, MS (2006, September). Podcasting and iPods as a solution to mobile-based learning.
- Rankin County (MS) School District. (2006, May-June). Podcasting in the classroom.
- Itawamba Community College, Tupelo, MS (2006, May). Assisted with planning for podcasting in the Distance Learning department.
- Sewell & Associates and Darrell Marecel. (2006, May). Advised regarding forming a Christian contemporary worship training school.
- Lee County (MS) Library. (2006, April). Advised regarding digital storytelling project involving older citizens' stories of surviving natural disasters in Tupelo, such as the infamous tornado of 1939.
- Crye-Leike Realty, Inc., Tupelo, MS (2006, February-present). Assisted the Managing Broker in creating the first real estate podcast for the State of Mississippi. <http://normacast.libsyn.com>
- Crye-Leike Realty, Inc., Tupelo, MS (2005, November). Goal-setting retreat. Led real estate agents through a process for setting individual and corporate goals.
- Celebration Ministries, Bells, TX (2004, July-October). Led the development of a proposal to design and install a high-speed Internet connection to a remote retreat location for Celebration. This involved coordinating conversations among clients and vendors.
- Crye-Leike Realty, Inc., Tupelo, MS (2004, February-June). Evaluated real estate agent technology needs. Designed and installed an online realty client and property listing management process. Increased efficiency and convenience for realtors and broker. Developed charts and spreadsheets showing realtor performance, as well as agency performance in comparison to other local agencies.
- Celebration Ministries, Bells, TX (2004, February). Brokered a team of technology consultants to solve business implementation problems within this organization. In addition, a strategy was developed for the client that would lead to further consultancy in meeting ongoing challenges.
- Learning Points Associates, Naperville, IL (2003, December). Provided third-party review of critical documents prior to their release to constituents in the North Central Regional Education Laboratory (NCREL) region.
- Morehead State University, Morehead, KY (2003, November). Conducted an on-site visit with top-level university administrators, college deans, and unit leaders for the purpose of helping them frame their desire to develop academic technology plans for each college and unit, followed by a comprehensive technology plan for the entire university.
- Miracosta College, Oceanside, CA (2003, October). Conducted day-long technology planning retreat, for the purpose of aiding the college in revising its technology plan. Also provided critique of existing documents to be used in planning, as well as proposed framework documents.
- Celebration Ministries, Bells, TX (2003, July-August). Provided background research findings regarding installation of high-speed Internet connection, as well as an equipment list and deployment schedule for QuickTime™ streaming media.
- Concordia Parish (LA) School District. (2003, March). Provided on-site consultation regarding school facilities planning—architectural concerns regarding technology in the expansion of existing school plan.

- State Educational Technology Directors Association (SETDA) National Leadership Summit (2002, December). Washington, DC. Invited as a consultant to provide insight, advice, and guidance for discussions related to the new national technology plan.
- Florida Learning Alliance, Tallahassee, FL (2002, September-December). Assisted with development and passage of FLA Strategic Plan. Facilitated strategic planning retreat at Wakulla Springs, FL involving constituent partners.
- Crescent Project, Tupelo, MS (2001). Various technology consulting. Developed sample strategic telecommunications development plan for grant application.
- Technology planning consultancy has been provided to hundreds of school districts in all 50 states and multiple nations. Services have ranged from general advising to development of a technology plan to evaluating schools' existing plans.

Research and Grants Proposed/Funded

Digital Lamplighters: Creating Strong Community Leaders through Digital Storytelling.—A proposal to federal agencies through We Care America, Washington, DC. (2005). Request—\$60,000.

Digital Lamplighters: Creating Strong Community Leaders through Digital Storytelling.—A proposal to the Carpenter Foundation. (2004). Request—\$151,523.70. Not funded.

Digital Storytelling: Showcase of Leadership through the Eyes of America's Youth.—A grant proposal to multiple foundations. (2004). Request—\$399,516.96. Pending.

The Historical Global Introduction of Mississippi Arts to the World Wide Web: An Alliance of MSU Music, Technology & Education, and Apple Computer, Inc.—A proposal, in conjunction with Dr. Mark Applebaum, Department of Music, to support the production of the first arts event, a jazz concert, broadcast live over the World Wide Web. Mississippi State University. (1999). Request—\$57,706.35. Funded

Look to the Stars (LITS)—A proposal to the U.S. Department of Education as a part of the *Preparing Tomorrow's Teachers to Use Technology* grant program. (1999). Request—\$1.8 million/3 years. Not funded.

Desktop Videoconferencing for the Student Teaching Experience—A BellSouth Foundation proposal, prepared in conjunction with the Mississippi Institutions of Higher Learning, Technology office. (1998). Request—\$250,000. Not funded.

Teacher Empowerment Network—A proposal, prepared in conjunction with and on behalf of The McGuffey Project, Washington, DC. Submitted to MicroSoft Corporation. (1998). Request—\$500,000. Results unknown.

Teacher Empowerment Network—A proposal, prepared in conjunction with and on behalf of The McGuffey Project, Washington, DC. Submitted to Benton Foundation. (1998). Request—\$250,000. Results unknown.

Teacher Empowerment Network—A proposal, prepared in conjunction with and on behalf of The McGuffey Project, Washington, DC. Submitted to AT&T Foundation. (1998). Request—\$500,000. Results unknown.

Teacher Empowerment Network—A proposal, prepared in conjunction with and on behalf of The McGuffey Project, Washington, DC. Submitted to AT&T Learning Foundation. (1998). Request—\$250,000. Results unknown.

AutoCAD: A practical, application-oriented approach for teachers, Mississippi State Department of Education Vocational-Technical Division, 1992, \$5663.

Revolutionizing education: An introduction to CD-ROM technology. MSU 1991 Special Teaching Project, \$1700.

AutoCAD: A practical, application-oriented approach for teachers, Mississippi State Department of Education Vocational-Technical Division, 1991, \$5663.

AutoCAD: A practical, application-oriented approach for teachers, Mississippi State Department of Education Vocational-Technical Division, 1990, \$5663.

Music composition by computer: Conquering the impossible dream, MSU 1990 Special Teaching Project, \$1500.

Integration of advanced technologies into progressive teacher education strategies. (with Brook and Tartt), International Business Machines, 1989, \$125,000.

HyperTutor: Teachers learn to program computers the easy way, MSU 1989 Special Teaching Project (with Spangler), \$1000.

Production of interactive videodisc technology, Principal Investigator, MSU 1987 Research Initiation Grant (with Spangler), \$5000.

The application of knowledge-based expert systems to instructional delivery with Brook, Carter, Cotton, Hodges—AT&T Grant. Role: Project Coordinator. Date: FY '86. \$100,000.

Other

- Chosen as charter member of USPAC (United States Policy Advocacy Council), a panel of leaders serving on behalf of ISTE (International Society for Technology in Education) to create policy and advise congressional offices on policy affecting information/instructional technology (2000).
- Initiated desktop videoconferencing speaker series (1999). Initial program, “Technology Planning in Higher Education”—guest speaker: Alan Brown.
- Co-hosted Internet videoconference (CU-SeeMe™) with Surrey, British Columbia, Canada, technologists and administrators. Topic: Presenting the Surrey Technology Plan online (1998, February).
- Conducted Internet videoconference (CU-SeeMe™) with Mark Benno, Waco (TX) Independent School District, as a demonstration of desktop videoconferencing to professional educators (1998, February; 1998, July).
- Conducted Internet videoconference (CU-SeeMe™) with Dr. Dan Lake, Syracuse, NY, to demonstrate to education and business leaders the power and capability of desktop videoconferencing (1998, February).
- Represented Mississippi as a chosen delegate (along with members of the Mississippi Legislature, Mississippi Department of Education, and Mississippi Exemplary Teachers Program) to the National Technology in Learning Conference sponsored by the Milken Family Foundation, Los Angeles, CA. (1998, June).
- Selected by National Strategies Corporation to assist educational institutions in the Washington, D.C. area to implement technologies in pragmatic ways, 1996.
- Panelist on Mississippi Educational Television program, *TechnoOptions*, as Chair of the Council for Education Technology (with Ray, Slater, and Soule’), Jackson, MS, August, 1995. Topic: *Technology Planning for the 21st Century Classroom*.
- Conducted basic Internet training for faculty, Rankin Elementary School, Tupelo, MS (with Perry and Deshazer), June 1995.
- Co-sponsored with *Electronic Learning* magazine and the Scholastic Network (Scholastic Publishing, New York City), on behalf of the National Center for Technology Planning, the First National Technology Planning Competition, 1995.
- Reviewer for Murrah High School (Jackson, MS) Technology Plan, 1995.
- Reviewer for the Maryland Business Roundtable for Education—Maryland State Technology Plan, 1994.
- Reviewer for Roswell (NM) School District Technology Plan, 1994.
- Software reviewer for *The Journal of Educational Multimedia and Hypermedia*
- Software reviewer and contributing author for *Ed-Tech Review*
- Textbook reviewer for Allyn & Bacon Publishers, Simon & Schuster, Paramount Publishing
- Online forum manager for Scholastic Network (Scholastic Publishing Company), a portion of America Online. Forum topic: Technology Planning
- Guest speaker, Starkville (MS) Rotary Club. Topic: *Instructional Technologies for Teaching—Removing the cloak of secrecy*.
- Guest speaker, Columbus (MS) Rotary Club. Topic: *The Information Superhighway*.
- Guest speaker, Rankin County (MS) Administrative Staff Development Day. Topic: *What’s New in Instructional Technologies*.
- Delivered interactive presentation (with Perry) at Aberdeen (MS) High School to community and school leaders on the topic of: *The Internet: What It Can Mean to Your Students, Your Community, and You*.
- Served as guest consultant for delegation of education leaders from China visiting Mississippi State University.
- Guest panelist on the MS ETV production, *TechnoOptions*, as an expert in the area of technology planning, 1994.

- Conducted four Internet training sessions (with Perry) for members of the Provost's Academic Affairs Support and Advisory Council at Mississippi State University.
- Conducted 24 hands-on Internet training sessions (with Perry) for MSU faculty and staff members. This training was offered through the Office of Human Resources.
- Served as guest panelist for the MS ETV forum, *Networking Mississippi*. My participation was, primarily, in the area of technology planning as it reflects federal legislative mandates and relates to networking activities in Mississippi.
- Guest speaker for "Teacher's Time"—an interactive professional development activity for educators, offered via the Mississippi FiberNet 2000 network. Topic: *Technology Planning: The Right Thing to Do*.

Professional Honors:

- Selected as Charter Member, Apple Distinguished Educator Advisory Board, 2005-2007.
- Appointed by Mississippi Governor Ronnie Musgrove to a four-year term on the Council for Education Technology, 2002.
- Chosen for membership in the *Impact 30*, a distinguished group of leaders who are recognized by *eSchool News* as the 30 most impactful leaders in technology, 2001.
- Chosen by *Classroom Connect* as a judge in their "Internet Educator of the Year" award program, 2001.
- Selected as Apple Distinguished Educator (ADE), the first ADE to be selected from higher education in Mississippi, 2000.
- Appointed to International Board of Advisors, British Columbia Open Learning Agency, Victoria, British Columbia, 2000.
- Elected to Board of Directors, International Society for Technology in Education (ISTE), 1998-2000.
- Appointed to the Benton Foundation (Washington, DC) Advisory Board on Digital Divide, 1999.
- Appointed by Mississippi Governor Kirk Fordice to a four-year term on the Council for Education Technology, 1998.
- Appointed by Mississippi Governor Kirk Fordice to a four-year term on the Council for Education Technology, 1994.
- Elected Chairman, Council for Education Technology, 1994-1998, 1998-2002, 2002-2006.
- Technology Educator of the Year, Mississippi Educational Computing Association, January 1995.
- Appointed by Mississippi Governor Kirk Fordice and Superintendent of Education Tom Burnham to the Support Team for Educational Progress (STEP), September 1995.
- Selected as a full partner by NASA's Tri-State Education Initiative in conjunction with the National Center for Technology Planning, 1993.
- Outstanding Graduate Student in Educational Leadership—Administration and Planning, The University of Alabama, 1989.
- Outstanding Graduate Student in Educational Leadership—Administration and Planning, The University of Alabama, 1988.
- Recognized as Founder of the Mississippi Educational Computing Association, February 1985.
- Outstanding Young Educator, Starkville (MS) Jaycees, 1976.
- Outstanding Industrial Arts Teacher, American Industrial Arts Association, 1975.
